

Alligator	Crocodile
Breakfast	Dinner
Day	Night
Frogs	Toads
Boat	Ship
Butterfly	Moth
Birthday	Date of Birth
Mouse	Rat
Blanket	Pillow

**Answer Key (all of the items are different from one another but the reasons may not be readily apparent to the children)**

Crocodiles and Alligators: Alligators have a U-shaped nose and crocodiles have a V-shaped snout.

Frogs and Toads: Frogs have longer legs and smooth skin. Toads have textured skin and shorter legs.

Boat and Ship: Boats are under 500 tons and usually are operated in smaller bodies of water. Ships are over 500 tons and can travel on the oceans.

Butterfly and Moth: Butterflies are active during the day and hold their wings down when resting on an object. Moths are active during the night and hold their wings out when on an object.

Birthday and Date of Birth: Birthday is day on the calendar when you celebrate your birth. Birthdays happen every year. Date of birth is the date and year when you were born. It only happens once.

Mouse and Rat: Mice are much smaller than rats.
